[Dev C Code For Tic Tac Toe](#)

The screenshot shows the Dev-C++ 4.9.9.2 IDE interface. The main window displays a C++ code file named 'main.cpp'. The code includes headers for 'allegro.h' and 'allegro_primitives.h', and defines 'init()', 'deinit()', and 'main()' functions. The 'main()' function uses a 'while' loop to wait for the 'ESC' key. The 'init()' function sets up the Allegro environment, including window creation and timer installation. A 'Tools' menu is open, showing options like 'Compiler Options', 'Environment Options', 'Editor Options', 'Configure Shortcuts', 'Configure Tools', 'Check for Updates/Packages...', and 'Package Manager'. The status bar at the bottom indicates 'Done parsing in 0.02 seconds'.

```
#include <allegro.h>
#include <allegro_primitives.h>

void init();
void deinit();

int main() (
    init();

    while (!key[KEY_ESC]) {
        /* put your code here */
    }

    deinit();
    return 0;
}
END_OF_MAIN()

void init() (
    int depth, res;
    allegro_init();
    depth = desktop_color_depth();
    if (depth == 0) depth = 32;
    set_color_depth(depth);
    res = set_gfx_mode(GFX_AUTODETECT_WINDOWED, 640, 480, 0, 0);
    if (res != 0) {
        allegro_message(allegro_error);
        exit(-1);
    }

    install_timer();
    install_keyboard();
}
```

In external mixing mode, the TRAKTOR software offers separate audio outputs for each Deck.. When working in the iTunes node of the TRAKTOR Browser, please consider the following: The tags (Title, Artist, etc.. Setting up TRAKTOR for External Mixing TRAKTOR allows you to configure the software for external mixing mode by selecting it under Mixing Mode in TRAKTOR Preferences Output Routing.

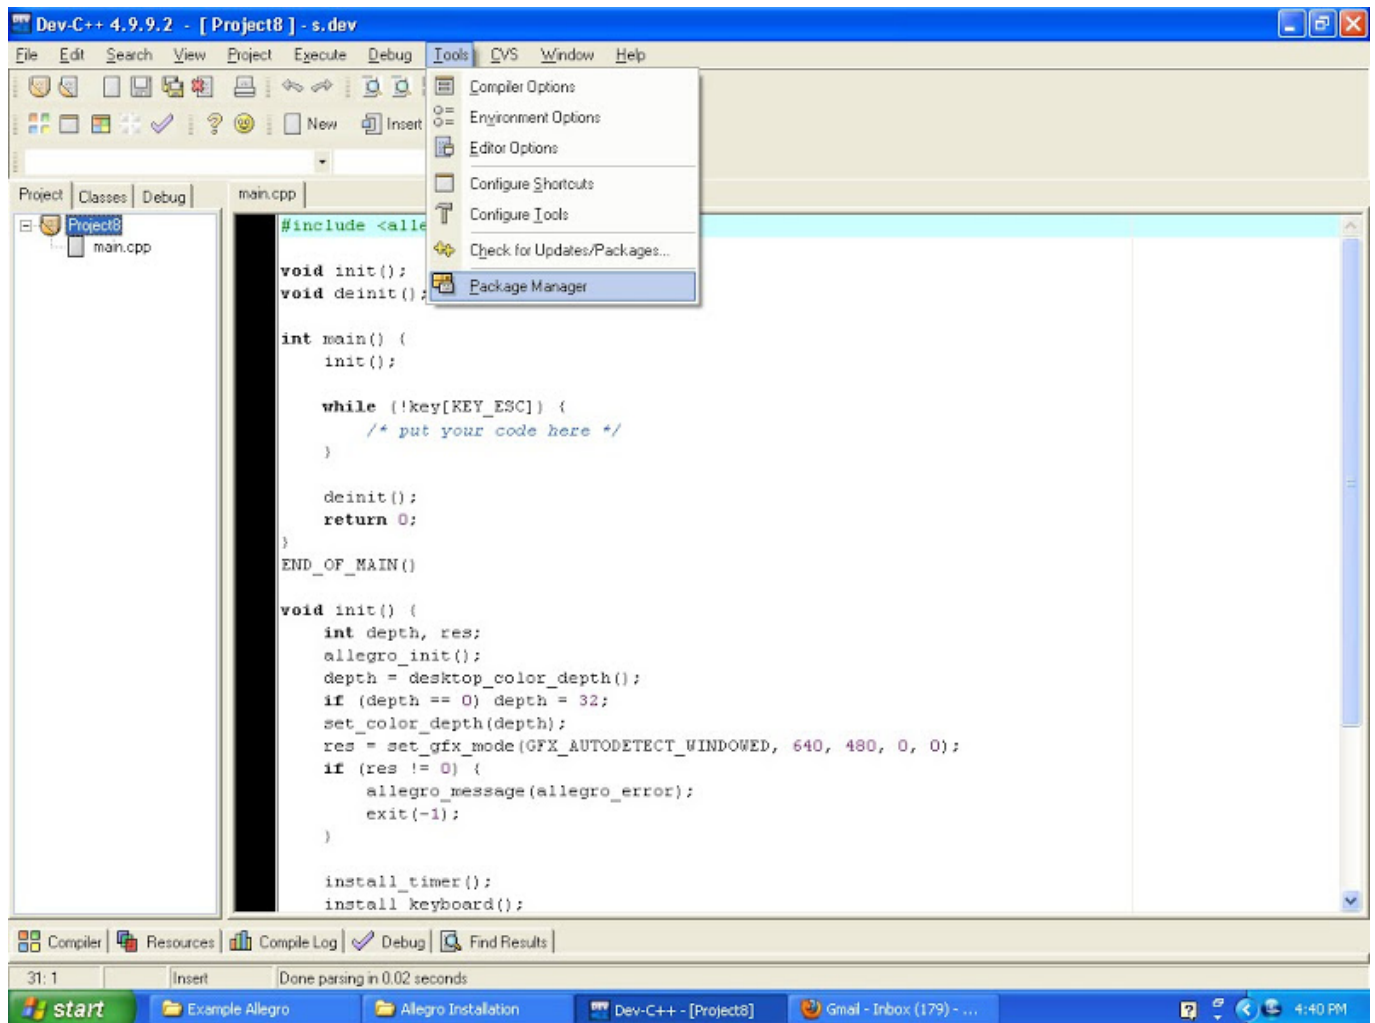

1. [code](#)
2. [codepen](#)
3. [codecademy](#)

) of greyed out tracks cannot be edited but you can load and play these tracks When a track is loaded into a Deck, it is added to the Track Collection.. We recommend to edit your tags only in TRAKTOR's Track Collection Traktor pro audio device setting grayed out.
